

Facing the Wave of Uncertainty that Lies Ahead June 15, 2017

This year the New Jersey HIMSS Chapter spring event kicked off in style with a Wednesday night networking reception on the patio of the Ocean Place Resort overlooking the surf. We had over 80 attendees enjoy the reception taking in the Jersey Shore beach and fresh ocean air.

On Thursday morning our educational event started with Janine Gesek turning her reign of the Chapter over to the new incoming president, Tom Gordon, CIO Virtua Health System. We were pleased to have had great participation from our sponsor community. To foster greater collaboration this year we featured round table lunch discussions on key topics like MACRA, MIPS, Telehealth, Healthcare Today and Cybersecurity.

This year's event had a major focus on MACRA and the impact this will have on our industry. We also had a Cybersecurity update on lessons learned from the NJ-HIMSS - NJHA partnered 2-day cybersecurity tabletop simulation exercise facilitated this past March by Sensato healthcare security professionals. The day ended with a panel discussion on TeleHealth with representation from the payer, provider & vendor communities. This panel was moderated by Sumit Nagpal from the HIMSS National Board.
